EDUCATION

University of North Carolina at Chapel Hill

Bachelor of Science in Computer Science

Chapel Hill, NC

Expected May 2030

EXPERIENCE

Software Engineering Intern

June 2026 – August 2026

Earnest

Remote

- Built a Retool and PostgreSQL approval workflow for artifact changes, reducing accidental configuration changes by approximately 90%.
- Integrated REST APIs for submitting, approving, and rejecting changes, storing before/after states as structured JSON for auditability.
- Built a before-and-after comparison interface to help reviewers identify and validate artifact changes before approval.

Software Engineering Intern

Jun. 2025 – Aug. 2025

Storable

Remote

- Developed and tested full-stack features using Ruby on Rails, React, HAML, and Cypress for storage management software.
- Completed 30+ engineering tickets, contributing to an approximately 30% reduction in the team's development backlog.
- Collaborated with engineers in an Agile environment to debug issues, review code, and deliver maintainable features.

Software Engineering Intern

Jun. 2024 – Aug. 2024

ExpertVoice

Remote

- Developed and tested Java applications using Spring Boot, JUnit, and Mockito to improve software reliability.
- Expanded automated test coverage from 12% to 87% by implementing and improving unit tests across the codebase.
- Migrated testing infrastructure from JUnit 4 to JUnit 5 and integrated APIs to improve development workflows.

PROJECTS

Document RAG Research Assistant | *Python, Streamlit, PyMuPDF, Sentence Transformers, NumPy* Aug. 2026

- Built a RAG application to extract, chunk, and semantically search information across research PDFs.
- Implemented embeddings and cosine similarity retrieval with page-level citations and Top-K source ranking.
- Evaluated retrieval quality using Hit@K and Precision@K metrics with configurable test queries.

Commandly AI | *React, Vite, Supabase, Netlify Functions, Gemini API*

May 2026 – Present

- Built an AI-powered SaaS dashboard for small businesses to manage leads, campaigns, automations, and AI-generated content.
- Implemented Supabase authentication, protected routes, PostgreSQL-backed workspaces, and Row Level Security for user data.
- Integrated Gemini through Netlify Functions and added Stripe billing infrastructure for subscription-based access.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, SQL, HTML/CSS

Frameworks & Libraries: React, Ruby on Rails, Flask, Streamlit, Spring Boot, Pandas, NumPy, Sentence Transformers, PyMuPDF

Databases & Platforms: PostgreSQL, Supabase, Firebase, Netlify, Retool

Developer Tools: Git, Docker, Postman, VS Code, IntelliJ, Jira
